

“Election Security is my Top Priority.”

**GEORGIA SECRETARY OF STATE
BRAD RAFFENSPERGER**

As Secretary of State, Brad Raffensperger made it his top priority to secure Georgia’s election systems. Following bipartisan legislation, recommendations from a bipartisan commission, and a fair bid process, Secretary Raffensperger and his office selected the most secure and cost-effective voting system in America.

The Secretary and his team has partnered with Department of Homeland Security (DHS), The Cybersecurity and Infrastructure Security Agency (CISA), as well as private-sector security experts to provide a layered approach to cyber security.

In November of 2019, Georgia was the first state in the Southeast to conduct a risk-limiting audit of an election: A systematic way to validate the integrity of election results.

SECURE THE VOTE

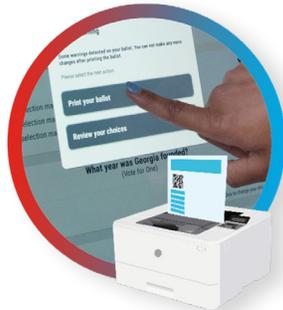

✓ Secure Selections

Once you have inserted your voter card into the touchscreen ballot marking device, your ballot will appear and you will be able to make your selections behind a secure, privacy screen.

✓ Secure Paper Ballot

After printing your paper ballot, **review** your choices to ensure they are correct.

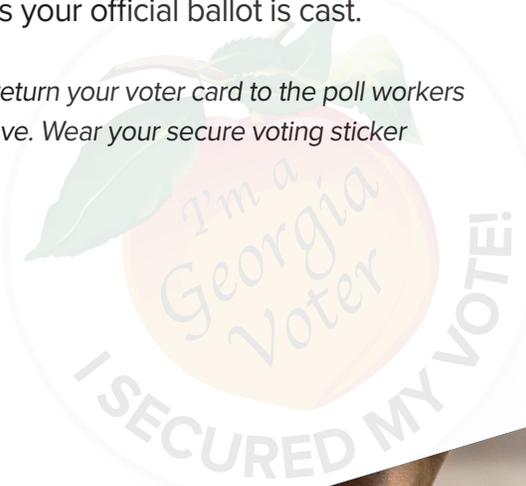

✓ Secure Your Vote

After confirming that the printed, paper ballot accurately reflects your choices, take both the voter card from the ballot marking device and your printed, paper ballot from the voting station. Insert your printed, paper ballot into the secure scanner and watch as your official ballot is cast.

Make sure to return your voter card to the poll workers before you leave. Wear your secure voting sticker with pride!
